

DISPLAY SCREEN EQUIPMENT POLICY

POLICY STATEMENT

Our intention is to optimise the use and application of display screen equipment, whilst safeguarding the health, welfare and job satisfaction of those involved in using such equipment.

PROCEDURE

Where you experience visual difficulties and have a good reason to believe that these may be caused by **regular work** with a display screen, you should speak to the Chairman in the first instance.

RADIATION AND PREGNANCY

You are not at risk from radiation when using display screen equipment. Scientific research has concluded that such concerns are unjustified. No adverse ill effects have been found to arise from display screen equipment. Thus there is no reason for a person who is pregnant, or is seeking to become pregnant, to avoid working with such equipment.

SELF-ASSESSMENT OF THE WORKSTATION

Users of display screen equipment will be invited to complete a self-assessment checklist to assist the Council in providing a comfortable and safe working environment.
